DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1-3 and 6-8, in the reply filed on 4/02/07 is acknowledged. Additionally applicant elects the species comprising a dienophile having an anhydride functionality, a soybean vegetable oil, and a hydroxyl vinyl monomer.
2. The traversal is on the ground(s) that a search for the invention of claim 1 would necessarily complete the search necessary for the invention of claims 9-12. This is not found persuasive because in the instant case the product as claimed can be made by another and materially different process such as by reacting a vegetable oil with a functionalized vinyl monomer with subsequent reaction of this intermediate product with an enophile or dienophile having an acid, ester or anhydride functionality.

The requirement is still deemed proper and is therefore made FINAL.

3. Claim 4, 5 and 9-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 4/2/07.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re*

Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-3 and 6-8 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-8 of copending Application No. 11/387,065. Although the conflicting claims are not identical, they are not patentably distinct from each other because the textile finishes of the '065 application are a type of composition and so read upon the claims of the present invention.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

6. Claims 1-3 and 6-8 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-8 of copending Application No. 11/345,653. Although the conflicting claims are not identical, they are not patentably distinct from each other because the polyethylene glycol having a vinyl functionality are equivalent to the functional vinyl monomer of the present claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

US Patent No 6,174,948 is cited to document compositions having a reaction product of unsaturated vegetable oil and a functional vinyl monomer.
